REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: claim 1 includes the limitations of a virtual peripheral bus and a configurable host bridge operably coupled to the virtual peripheral bus, wherein the configurable host bridge supports a host mode of operation in which it serves as a host bridge, and wherein the configurable host bridge supports a device mode of operation in which it operates as a device. These limitations are not present in the prior art in combination with the other elements in the claim and would not have been obvious.

2. The closest prior art appears to be the patent to Buckland et al., U.S. Pat. No. 6,581,129 B1, which shows a peripheral bus switching system (109) with a peripheral bus (112) and first and second bridges (113 and 115) that couple to a first end of the peripheral bus and at a second side to a peripheral bus fabric (114 and 116). There is a configurable host bridge (110), however it does not show the claimed details regarding the host mode and device mode and the peripheral bus is not a virtual peripheral bus. These limitations do not appear as if they would have been obvious to one of ordinary skill in the art.

3. The other cited references show bus bridges but they are missing at least the limitations noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn A. Auve whose telephone number is (571) 272-3623. The examiner can normally be reached on M-F 8:00 AM-5:30 PM, every other Friday off.
